SembCorp Industries' Engineering and Construction Subsidiary Secures \$160 million Sludge Digester Facility Contract for Changi Water Reclamation Plant Project

SembCorp Engineers and Constructors (SembE&C) has received a \$160 million contract from Public Utilities Board (PUB) to build a sludge digester facility for its Changi Water Reclamation Plant Project.

SembE&C will design, construct and commission the sludge digester facility, which forms part of the water reclamation plant project. At this digester facility, sewage sludge is treated and reduced to facilitate further waste treatment processes in the water reclamation plant. This is the second contract that SembE&C has secured from PUB for its Changi Water Reclamation Plant Project. The company was awarded a contract to build a sludge drying system for the same project in March this year.

Construction work has commenced and the plant is expected to be completed by end 2007.
